CATL stated in the announcement that the main drivers of performance growth were as follows:

> 1. Continuous growth in the industry. In terms of power batteries, the growth in global new energy vehicle sales has driven the continuous increase in demand for power batteries. According to data from SNE Research, global new energy vehicle sales reached 21.47 million units in 2025, a year-on-year increase of 21.5%, with global power battery usage reaching 1,187 GWh, up 31.7% year-on-year. Regarding energy storage batteries, driven by national clean energy transition targets, along with increased proportions of wind and photovoltaic installations, higher requirements for flexibility in the power system, advancements in energy storage technology, reductions in system costs, and emerging demands such as data centers, market demand for energy storage batteries has continued to grow rapidly. According to statistics from SNE Research, global energy storage battery shipments reached 550 GWh in 2025, a year-on-year increase of 79%.

> 2. The company's competitive advantages have further improved. The company adheres to the business philosophy of technological leadership, superior service, and operational excellence, striving to provide world-class products and solutions to global customers. Based on strong innovation capabilities, deep industry insights, and efficient management practices, the company has further enhanced its competitive advantages in areas such as technology research and development, product innovation, branding and marketing, extreme manufacturing, ecosystem development, and zero-carbon expansion. With leading comprehensive competitiveness in the industry, it has achieved steady business growth and continued to create value for shareholders.

In terms of dividends, the announcement shows that the company plans to distribute a cash dividend of RMB 69.57 per 10 shares (including tax) to all shareholders. The total amount of cash dividends proposed for distribution this time is RMB 31.532 billion. Adding the interim dividend distributed in 2025, totaling RMB 4.568 billion, CATL's total cash dividends distributed in 2025 amounted to RMB 36.1 billion, representing 50% of the net profit attributable to shareholders of the listed company in the 2025 consolidated financial statements.
